

Subscription & Usage Terms

Version 3.0 — July 10, 2026

WHAT CHANGED

Added the Publisher's intra-EU VAT number (FR05106974637). Otomata is a SASU registered in Marseille (SIREN 106 974 637). Otherwise unchanged.

Purpose

In short: These terms (version 2.0) govern the subscription and use of oto, an automation platform connected via MCP. By using oto, you agree to them.

These terms (version 2.0) govern access to, subscription to, and use of oto — an automation platform ("toolbox") connected to your assistant via the MCP protocol (oto.cx, mcp.oto.cx).

oto is published by **Otomata**, a SASU registered in Marseille (SIREN 106 974 637, intra-EU VAT FR05106974637), the "Publisher", represented by Alexis Laporte — see the [legal notice](#).

Using the service implies full acceptance of these terms. If you do not agree, please do not use oto.

Service Access

In short: Sign-up is open; an account is required to access the service.

Sign-up to the service is **open**; access requires creating an account. The Publisher may suspend or revoke access in case of abuse or breach of these terms.

The Publisher reserves the right to temporarily suspend access for maintenance or updates, informing users where possible.

User Account

In short: Sign in via OAuth 2.0 / PKCE through Logto. No shared password is stored.

Sign-in is performed via **OAuth 2.0 / PKCE** through Logto (auth.oto.ninja, self-hosted by the Publisher). No shared password is stored on our servers.

You are responsible for all activity under your account. In case of abuse, the Publisher reserves the right to suspend or delete the account without notice.

You manage your account, connectors, and subscription from manage.oto.cx. To close your account and have your data erased, email alexis@otomata.tech.

Acceptable Use & Agent Supervision

In short: Normal, lawful use. You supervise your Agents: connectors can perform binding actions, so it's up to you to require human validation.

oto is provided for normal professional and personal use. You are responsible for how you use the connected tools and the data you process with them.

Agent supervision. oto lets your agents (AI assistants) call connectors that may, depending on their configuration, perform actions with real-world effects (sending a message, writing to a third-party tool, etc.). It is your responsibility to **supervise your agents and to require human validation for any binding action** (contractual, financial, or affecting third parties). The Publisher does not guarantee that an agent-triggered action is always preceded by validation: that control depends on your configuration and oversight.

The following are prohibited:

Any action intended to disrupt, circumvent, or overload the platform's operation

Scraping or automated extraction of the platform itself

Any unlawful use, or use that infringes the rights of third parties

Commercial resale or redistribution of the service

Any use contrary to the terms of the connected third-party tools

Subscription & Billing

In short: A free tier and tiered subscriptions (€250 / €500 / on quote). Hands-on support (time spent) is a separate service. Reasonable use ("fair use") of third-party APIs applies.

oto is offered on a **per-organization subscription** model: a **free tier** and paid tiers (indicatively €250 and €500 per month, plus an **on-quote** tier for extended needs). The current tiers, scopes, and pricing are shown on manage.oto.cx.

Paid subscriptions are billed by the Publisher and collected via a licensed payment provider (Stancer, a payment institution supervised by the French ACPR). Card details do not pass through our servers.

Fair use. The service relies on third-party APIs (data, enrichment, AI models) subject to their own quotas. Use that is clearly disproportionate to the subscribed tier may be adjusted, after notice.

Support. Any hands-on service (setup, training, custom development — billed by time spent) is **separate** from the subscription and covered by its own quote or purchase order.

The Publisher reserves the right to change tiers and pricing, with prior notice and effect from the next billing cycle.

The sale conditions for paid subscriptions (ordering, payment, term, renewal, termination) are detailed in the [terms of sale](#), accepted at purchase.

Intellectual Property

In short: The oto platform remains the Publisher's property. Your data and content remain yours.

All elements of oto (unpublished source code, interfaces, text, logos, design) are protected by copyright and remain the exclusive property of the Publisher, unless otherwise stated. Some of oto's building blocks are released as open source under their respective licenses.

The data, content, and credentials you process or connect via oto remain your property. The Publisher claims no rights over them. Unauthorized reproduction or redistribution of the platform's unpublished elements is prohibited.

Limitation of Liability

In short: oto is under active deployment. The Publisher's liability for direct damages is capped at amounts you paid over the last 12 months; indirect damages are excluded; certain statutory exceptions remain uncapped.

oto is under active deployment. The Publisher uses reasonable efforts to ensure the availability and security of the service, without however guaranteeing uninterrupted availability.

Cap. To the extent permitted by law, the Publisher's total liability for **direct damages** is capped at the amounts actually paid by the Customer for the subscription over the **twelve (12) rolling months** preceding the triggering event (this cap is therefore nil for the free tier).

Exclusion. The Publisher shall not be liable for **indirect damages** (loss of business, revenue, data, customers, reputational harm, etc.).

Exceptions. These limitations do not apply and liability remains **uncapped** in the event of gross negligence or willful misconduct, personal injury, breach of a confidentiality obligation, or infringement of third-party intellectual property rights.

The service relies on third-party providers and services (notably Scaleway, Logto, payment providers, API vendors). The Publisher is not responsible for the content or practices of these external services.

Personal Data & Security

In short: How your data is processed is described in the privacy policy and the trust center.

The processing of your personal data is detailed in our [privacy policy](#). The allocation of responsibilities between the Publisher (processor) and the Customer (controller) is set out in a [data processing agreement \(DPA\)](#).

Your secrets and credentials for third-party tools are encrypted at rest (AES-256-GCM) and isolated per user. Details of our security measures are published on [trust.oto.ninja](#).

Versions & Changes

In short: These terms are versioned and archived. On each new version, your acceptance may be requested again. Past versions remain available.

These terms are **versioned**: the current version is shown at the top of the page, and previous versions remain accessible at a stable URL (e.g. `/terms/v1.0`), so the exact text in force on a given date can be retrieved.

The Publisher may update these terms. In case of a material change, your acceptance of the new version may be **requested again** at your next sign-in or subscription. A summary of changes is shown in the version changelog.

Applicable law: These terms are governed by French law. In case of dispute, the parties agree to seek an amicable solution before legal action. Failing that, the courts of Marseille, France shall have jurisdiction.
